Silflex[®]

Soft Silicone Wound
Healing Solutions

Advancis
Medical

medi. I feel better.

Breaking the Cycle Through Active Healing

PREPARE

Compress with confidence and prepare wounds with autolytic debridement

1

HEAL

Create optimal wound healing environment and accelerate closure with accurate compression

2

PREVENT

Sustain healthy skin and integrate lifestyle compression to prevent reoccurrence

3

Pain free dressing changes to improve quality of life

- Conforms to the skin's surface for gentle adherence
- Atraumatic dressing designed to minimize pain and trauma
- Large 2mm holes allow for passage of exudate
- Can be cut to size
- Hydrophobic silicone coating prevents dressing from adhering to wound bed

Silflex®

Description

Silflex® is an atraumatic wound contact layer made from polyester mesh coated with Silfix® soft silicone.

Indications

- Acute and chronic wounds that require protections
- Skin Tears
- Skin Abrasions
- Surgical Wounds
- Leg and Pressure ulcers
- Negative Pressure Wound Therapy (as a primary dressing)

Product	SKU	Sizes	Pack Sizes	HCPCS* Code
Silflex® Soft silicone wound contact layer	CR3922	2in x 3in	10	A6206
	CR3923	3in x 4in	10	A6206
	CR3924	5in x 6in	10	A6207
	CR3925	8in x 12in	10	A6208

Siltape®

Description

Siltape® is a roll of soft silicone fixation tape (non-sterile) with easy tear perforations, **no scissors are required**.

Indications

Use in adhesive applications to secure dressings, tubes, IV lines, or for skin tear management. Ideal for pediatrics, newborns and geriatric.

- Scar management, including hypertrophic and keloid scars.
- Protecting tissue from pressure damage or sores from tubing
- Manage skin tears and small incision sites
- Hold dressings in place
- Securing IV lines
- Protect skin from extended use of Personal Protective Equipment (PPE)
- Can be used in any situation where delicate or sensitive skin is an issue

Product	SKU	Sizes	Pack Sizes	HCPCS* Code
Siltape® Soft silicone perforated tape roll	CR3938	.75in x 118in	1	n/a
	CR3939	1.5in x 60in	1	n/a

*Code usage should be verified by responsible parties in accordance with all published guidelines.

Silflex[®] Soft Silicone Contact Layer

Pain free dressing changes to improve quality of life

In a recent study Silflex[®] scored better than an alternative silicone contact layer on mean pain scores at application, in situ and removal (see figure 1).¹

Using Silflex[®] can reduce pain, which improves quality of life, reduces anxiety and may improve the healing process²

Figure 1: Mean pain scores

1. Edwards J, Mason S A. Developing a structured process for evaluating burn dressings. Poster presentation
 2. Holden-Lund C (1987) Effects of relaxation with guided imagery on surgical stress and wound healing. Res Health Nurse 11(4): 235-44

Dressings with Silfix[®] technology can be found in the Eclypse[®], Advazorb[®] and Silflex[®] ranges.
